

RING SIZE GUIDE

Follow these steps to determine your ring size:

1. Print this page. To make sure the printing is right, measure the line above with a ruler, it should be 15 cm long.
2. Find a ring that you wear frequently and fits you perfectly.
3. Position your ring consecutively on the circles above until you find the circle that has the same perimeter with your ring.
Attention: The black line of the circle should not be visible under the inner circle of your ring. If it is visible, try the next larger circle.
4. There is a number inside the circle. This number represents your ring size.
